Seeking a Summer 2027 internship in aerospace, EV, or mechanical design

Education

B.S. in Mechanical Engineering | University of Maryland, College Park — Expected May 2030

Design Tech High School @ Oracle | Redwood City, California | GPA: 4.32 — June 2026

Featured Project

Efficient RC Plane | Personal Project — February 2024 - Present

- Designed a 1,200mm wingspan plane in Onshape using an E207 airfoil for low-speed efficiency
- Cut mass 18% (263g to 216g) over 6 flight-tested revisions via slicer and part optimizations
- Lowered wing loading from 27.7 to 22.7 g/dm², cutting stall speed 10%
- Replaced stock LiPo with a custom 2S 18350 Li-ion pack, increasing onboard energy 41%

Experience

Terps Racing Electric Vehicle | Electrical Team Member — September 2026 - Present

- Designing a SolidWorks enclosure for a 4S LFP battery pack powering the low-voltage circuitry
- Redesigning HV battery charger to cut required outlets from 3 to 1 and add Raspberry Pi data logging

Hiller Aviation Museum | Summer Camp Assistant — June 2026 - August 2026

- Ran activities for 20+ campers and assisted instructors in STEM-focused aviation programs

Apperture Sàrl | Prototype Engineer (Remote) — September 2025 - August 2026

- Rebuilt 10+ legacy Rhino models of wearable products as parametric, editable Onshape CAD
- Designed toleranced functional parts (bezels, strap clips) for FDM/MSLA printing
- Ran MSLA production for 50+ batches end to end, from slicing to inspection
- Diagnosed and replaced cracked FEP films to minimize downtime

d.Aviation | Head of Mechanical (High School Club) — September 2022 - August 2024

- Designed a servo-actuated tennis ball intake and release mechanism; placed 3rd of 12 teams at the 2023 STEM-ED Aero Robotics Competition
- Led and trained a 5-person mechanical team; handled field repairs and firmware debugging at competition

Skills & Activities

CAD & Applications: SolidWorks, Onshape, KiCad
Manufacturing: 3D Printing (FDM & MSLA, 500+ hours), Laser Cutting, Soldering
Programming & Tools: MATLAB, Arduino IDE, Betaflight, Claude Code
Volunteering: 400+ hours at Samaritan House, Fanari Academy, and Hiller Aviation Museum (food distribution, teaching assistance, youth camps)
